Indigenous owned. Service driven. Site ready.

ABOUT INDI HIRE

WHO WE ARE

Indi Hire is an Indigenous-owned plant and equipment hire company supporting construction, civil, infrastructure and salvage projects.

We combine a modern fleet with experienced operators and a strong focus on safety, reliability and professional service. Whether it's a small urban dig or a large-scale salvage or infrastructure project, we make sure the right gear and people are on site, on time, every time.

OUR CAPABILITIES

EXCAVATOR & OPERATOR HIRE

1.5 Tonne – 25 Tonne Excavators

From tight-access residential jobs to large bulk earthworks, our excavator fleet covers all site conditions and project sizes.

- ✓ 1.5t – 5t excavators for tight, detailed and residential works
- ✓ 8t – 15t excavators for civil, drainage and bulk excavation
- ✓ 20t – 25t excavators for major infrastructure and salvage operations
- ✓ Skilled, ticketed operators with strong safety culture
- ✓ Available for day hire, night works and long-term projects

SIEVES FOR SALVAGE & SEPARATION

Purpose-built mechanical sieves to support salvage and screening works where separation and protection of material is critical.

- ✓ High-efficiency screening for soil, rubble and spoil
- ✓ Ideal for cultural heritage salvage, recovery and sorting
- ✓ Supports careful handling and reduced material loss
- ✓ Available as standalone equipment or with excavator and operator

TEMPORARY FENCING & SITE TOILETS

Keep your site compliant, secure and safe with our hire solutions.

Temporary Fencing

- ✓ Rapid deployment for small lots through to large linear sites
- ✓ Panels, feet and accessories for complete perimeter setups
- ✓ Suitable for construction, civil, infrastructure and salvage projects

Site Toilets

- ✓ Robust, site-ready portable toilets
- ✓ Hygienic, well-maintained units for workers and visitors
- ✓ Flexible hire terms for short and long projects

HYBRID POWER GENERATORS

Smarter, quieter and more efficient than traditional diesel-only units.

- ✓ Always-on battery supply for lights, cameras and low loads without idling a large generator
- ✓ Quieter operation, with battery-only mode delivering a major perceived noise reduction at night
- ✓ Lower fuel use and emissions compared with conventional generators, plus extended maintenance intervals
- ✓ Scalable, plug-and-play setup – units can be paralleled as your site grows to increase available kVA
- ✓ On-grid or off-grid ready, with the ability to accept solar input for further savings and flexibility

WHY CHOOSE INDI HIRE?

Indigenous-Owned & Professionally Run

Proudly Indigenous-owned, with a commercial, outcomes-focused approach to service and delivery.

Modern, Reliable Fleet

Well-maintained equipment minimising downtime and delays on site.

Experienced Operators

Professional operators who understand construction, civil and salvage environments.

Safety First

Strong safety systems, procedures and culture across all projects.

Flexible Hire Options

Day, night and long-term hire available to match project timelines.

Responsive & Easy to Work With

Clear communication, quick turnaround on quotes and fast mobilisation to site.

SAFETY & COMPLIANCE

At Indi Hire, safety is non-negotiable.

- ✓ Pre-start checks on all plant and equipment
- ✓ Competent, ticketed operators
- ✓ Safe work procedures and risk awareness
- ✓ Focus on protecting people, assets and the environment

We work closely with our clients to align with site-specific safety requirements, induction processes and environmental controls.

INDUSTRIES WE SUPPORT

- ✓ Civil construction
- ✓ Infrastructure & utilities
- ✓ Building & development
- ✓ Salvage & recovery works
- ✓ Industrial & commercial projects
